Case of Financial and Taxation Services

Background: A foreign-funded enterprise needed to commence liquidation due to difficulties in operation caused by force majeure. Since the company involved immovable property and intangible assets, the liquidation involved a lot of tax matters. Therefore, it wanted to ask a professional financial team for guidance and assistance in the liquidation. Considering that Brighture had provided financial consulting for the day-to-day financial operation of the company, it came to Brighture for help.

Service provided: Brighture have been providing financial and tax consulting services for the enterprise, and have a good understanding of their specific operation and financial situation. Therefore, based on the customer's situation, a detailed liquidation service plan was drawn up, which elaborated the tax-related matters in the liquidation of assets and liabilities. We calculated the tax amount, illustrated the process of deregistration and listed the information to be provided by the enterprise in each stage of the liquidation to help them understand the important matters that require attention. At the same time, Brighture applied relevant tax policies based on the actual situation of the enterprise, saving hundreds of thousands of Yuan in tax for the enterprise.

Friendly Reminder

The COVID-19 pandemic not only threatened our lives, but also greatly reduced the purchase orders of the vulnerable small, medium and micro enterprises, breaking their capital chains and putting them into liquidation.

When an enterprise is being liquidated, it needs to conduct a comprehensive liquidation of assets, liabilities, personnel and businesses, and value-added tax, land value-added tax, corporate income tax and individual income tax may be involved. Therefore, enterprises need to calculate the taxes involved in the liquidation in advance, and apply favorable tax preferential policies to reduce tax burdens in a reasonable and legal style.

As a professional service organization, Brighture provides enterprises with one-stop services such as tax planning, land value-added tax settlement and company deregistration.
